MAREK CHOVAN

SUMMARY

I enjoy a good challenge, I love learning new stuff and I'm always up for anything fun. I love programming because it's a creative tool for the modern world. When I'm not in front of a computer screen you can find me doing some sport or playing guitar.

EXPERIENCE

Front-End Developer, 06/2024 - Current
Pelmet s.r.o - external
In Pelmet we're working on a new video streaming platform. It's the first time I've been using Next 14 with all its new features in a commercial project. Since this app is expected to have huge traffic numbers, we are especially focusing on performance and testing. I'm learning a lot about Playwright and Jest and how to use them effectively.

Front-End Developer, 10/2020 - 06/2024
UlovDomov - Brno
I came to UlovDomov as a complete beginner and I've grown there so much. Learned Next.js and its various functionalities, rebuilt the search page with a new map. Dived into the world of Backend with Express and GraphQl, and REST too.

Front-End Developer, 02/2024 - 04/2024
Azimuth - external
Small US startup that needed to improve the performance and design of their map. They used Mapbox along with Deck.gl for 3D data visualisation. It was a fun experience, the CEO was a cool guy and I learned a lot about these technologies.

Front-End Developer, 03/2022 - 02/2023
Eventsframe - external
I worked in this startup with my friend while also working for UlovDomov. Figured out how to manage my time more effectively, learned various helpful practices and fixed a huge amount of bugs. I also found out I hate gigantic repositaries written in vanilla JS.

EDUCATION

Translation and Interpretation
Univerzita Pavla Jozefa Šafárika - Košice
Mostly focused on translating economics or law related texts, after 3 years I decided this wasn't my forte. It definitely helped to improve my level of english.

LANGUAGES

Slovak: First Language
English: C2
